Miscellaneous

System Requirements:	**Processor:** 1.4 GHz (x64) Single or 1.3 GHz (Dual Core) 2.0 GHz or faster (Recommended) **Hard Disk*:** 32 GB or greater **Memory:** 1 GB RAM 4 GB RAM or more (refer to Windows Server and SQL Server) Recommended 32 GB RAM (Maximum) **Note:** Actual requirements will vary based on your system configuration and the applications and features you choose to install. Processor performance is dependent upon not only the clock frequency of the processor, but also on the number of cores and the size of the processor cache. Disk space requirements for the system partition are approximate. Additional available space may be required if you are installing over a network *Computers with more than 16 GB of RAM will require more disk space for paging, hibernation, and dump files
