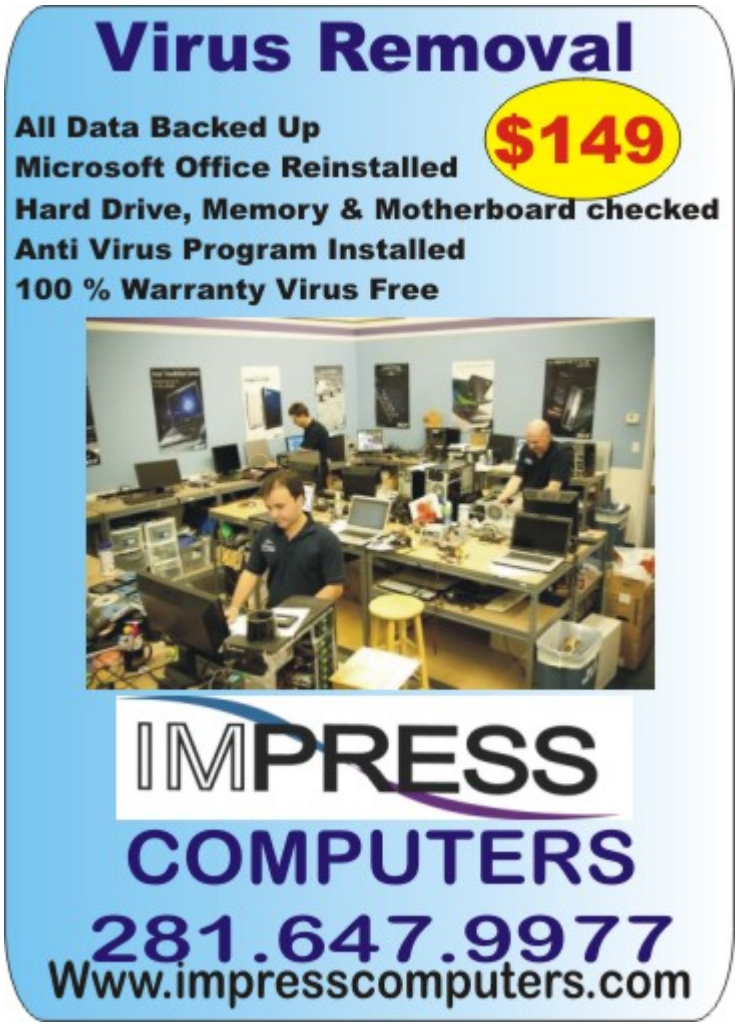
Computer Store Computer and Laptop Repairs Virus Removal Katy TX Houston TX

Impress Computers USA

Backup Wipe and Reload of computer

Price: **$149.95**



If your computer has a virus or your windows is corrupt or running slowly this may be an option for you

The first thing that we will do is:

1. Check your hard drive for bad sectors or if it has a bad spin count. If the hard drive has any faults this would be a good time to consider if it's better to replace the hard drive or replace the computer.
2. Check your memory. In a lot of cases your windows may get corrupted by faulty memory
3. Check your motherboard for leaking capacitors. There's no point in putting money into a computer that is likely to crash down the road with a faulty motherboard

We will then backup all your data. This will include your documents, pictures, music, desktop and favorites. If you have turbo tax or quickbooks then we can backup that data as well.

If you use outlook, outlook express or windows mail for your emails there will be an extra $30 charge as we will have to take some extra steps to setup your email, keeping your contacts and emails safe in the process.

If you use microsoft office, we can also get your product key before we wipe the hard drive so that we can reinstall it after we are finished.

Once we have all your hardware checked and data backed up we will then format your hard drive, install windows and download all of your drivers for sound, video, network cards etc.

From here we will restore all of your data to the correct location on your computer and reinstall office (if you had it previously).

You are now ready to collect your computer, but there are a few things that you will have to do:-

1. install your printer (you can get the software/drivers for your printer from the manufacturers website if you have misplaced your cd)
2. Install any other software
3. if you use outlook, outlook express or windows mail you will need to put in your username and password. If you have forgotten your password your ISP can reset this for you.

Re-installing Your Printer after you have finished:-

Follow these links to download your printer drivers

HP
Canon
Lexmark
Brother
Dell

We are located just north of the Katy Freeway and the Backup Wipe and Reload Option is your best buy for getting computer back on the same day. Houston and Katy TX 77084 and 77450
